

International Young Physicists' Tournament

Guide for jurors

Jury behavior:

- During the fight, jury members pay full attention to team performances. They are not allowed to discuss among themselves or with other people present in the room. Short answers and questions among jurors are allowed to clarify the report or discussion of the teams.
- Except the “Jury questions” phase, jurors are not allowed to ask or comment the appearance of team members.
- Questions from jury must be short, clear, not evaluating the performance of the teams and should allow a short and clear answer. No comments are allowed.
- Maximum time for putting a question is 15 seconds; maximum time for an answer is 30 seconds. One juror can give no more than two consecutive questions, if other jurors are interested to ask questions,
- Grading of every juror must be objective and fair. It takes into account the overall performance of the team during the whole stage, including questions/answers and discussion.
- Before showing the grades, all jurors have to write their grades clearly into the marking sheets. Chairman will check if this was done properly; after this check the change of grades is not allowed.
- If there is a single highest or lowest grade of a jury member, the jury member is asked to shortly explain his/her grading; this is done for all stages only after all grades for all stages are shown.

Team participation during the fight:

- Teamwork within the team is wished also during the physics fights, so team members have to be encouraged to help their team-mates within the scope of regulations.
- Only one team member takes the stage as Reporter, Opponent or Reviewer. Other team members are allowed to:
 - Post concrete questions and give concrete answers (also to questions from Jury).
 - Provide language support during the whole fight.
 - Help with the presentation of experiment and help technically (e.g. with computer presentation).
 - Pass written notes to Reporter, Opponent or Reviewer.
 - Give statements on specific issues during to discussion (only one team member at time).

International Young Physicists' Tournament

Chairpersons and Jury Rules

Version: Decided by EC 2011-04-06

To enhance and guarantee the quality of the chairpersons' work during the IYPT physics fights, the EC decided to prepare this list of rules. Every chairperson is asked to stick to these rules as closely as possible. However, duly justified deviations have to be accepted in certain cases.

Before the fight, the chairperson must:

- Introduce themselves, and then ask the jury members to introduce themselves and finally ask captains of teams to introduce their team members.
- Ask all team members to follow basic principles of correct scientific discussion and politeness.
- Announce the ordering of relevant teams during the forthcoming round.

During the fight:

- The chairperson must introduce every stage of the round.
- The chairperson must ask the team member on the stage to introduce him/herself, and also in writing, on the board.
- The chairperson must inform the teams as each stage in a round is reached according to the official clock. After preparation stages, the time for next stage starts running immediately after the announcement. For presentation stages, the chairperson can decide to let the speaker have a final remark, which cannot exceed 15 seconds.
- During the preparation stage for the report, if unexpected technical problems occur, the chairperson can decide to prolong the duration of this stage, but for not more than 3 minutes, with the exception of situations beyond the control of team members, e.g. projector or power failure. This exception does not cover failure to establish video connection between the projector and the team's computer, as this should have been tested in advance.
- A team's own equipment (except notebooks) requiring the connection to electricity can be used by teams only after prior permission of LOC. This decision has to be respected by the chairperson.
- Chairpersons are fully responsible for keeping the time limits, including questions of jury. They may stop a juror, if his/her question is inadequate and/or if he/she exceeds the time limit. They may also stop the team member, if his/her answer exceeds the time limit.
- If other persons in the room disturb the smooth running of the physics fight, the chairperson can ask them to leave the room.
- If there is a suspicion of an attempt of communication between teams and third persons, this fact must be reported to Secretary General immediately after the end of the stage.
- The taking of audio and video recordings is allowed, but only for persons affiliated with one of the teams participating in the fight. Such recordings must not be shared with other teams before the end of the Selective Fights.

Jury behavior:

- During the fight, jury members must pay full attention to team performances. They are not allowed to discuss proceedings among themselves or with other people in the room. Short questions and answers among jurors are allowed to clarify the report or discussion of the teams.
- Except for the "Jury questions" phase, jurors are not allowed to ask or comment on the contribution of team members.
- Questions from the jury must be short, clear, and not evaluate the performance of the teams, and should promote a short and clear answer. No comments are allowed until after scores have been announced at the end of the stage.
- The maximum time for posing a question is 15 seconds. The maximum time for an answer is 30 seconds. One juror can ask no more than two consecutive questions if other jurors are waiting to ask questions.
- The overall time limit for questions of the jury must be kept with the same tolerance as time limits for teams.
- Grading of every juror must be objective and fair. It takes into account the overall performance of the team during the whole stage, including questions/answers and discussion.
- Before showing the grades, the chairman checks that jury members have written their grades on the marking sheets.
- If there is a single highest or lowest grade of a jury member, the jury member is asked to briefly explain his/her grading. This is done for all stages only after all grades for all stages are shown.
- The chairperson is asked to report to Secretary General, if jury member(s) did break seriously or repeatedly the abovementioned rules.

International Young Physicists' Tournament

Guide for participants

The number of the participants in the IYPT grows every year and the teams are coming from all over the world. This gives the tournament a colorful and multicultural quality, which makes the IYPT always more interesting and pleasant. The basic idea of the tournament is to bring together young people from different parts of the world, to enhance their interest in physics and to experience a fair competition between them. It is the aim of the IYPT to develop good understanding, insight and appreciation between people of different experience and lifestyles. Respectful and courteous behavior is essential for a friendly atmosphere and for a pleasant social experience. Therefore we ask all participants to follow the following rules:

- 1) The team-leaders are responsible not only for the preparation and the correct participation of their teams in the physics-fights but also for an appropriate conduct during the whole period of the tournament.
- 2) The participants should be aware of the fact that they are representatives of their home countries, proudly showing their special identity without undue exaggeration. The behavior of the participants should be always respectful and attentive to the different cultural customs of other participants.
- 3) The teams are guests of the host country. This requires an adequate polite behavior. It is essential that all participants strictly observe the laws of the host country.
- 4) The teams are expected to attend all the official conducts organized by the hosts of the tournament. They are obligated to show up punctually at the fights and all the official events.
- 5) Appropriate outfit (e.g. school casual) is a sign of respect towards the hosts and all the other participants.
- 6) It is the duty of all participants to follow the directions of the Local Organizing Committee in any case and to contribute to an easy and frictionless development of the fights.
- 7) Technical changes, in particular, can be applied only in agreement with the LOC and any requests must be presented in good time before the beginning of the fights.
- 8) Conflicts and misunderstandings between the teams must be settled in a respectful way which does not offend sensibilities and feelings of other participants.
- 9) The belongings of other participants and the equipment provided by the organizers are to be handled carefully. In case of damage the cost-by-cause principle is applied.
- 10) During the competition, teams may draw ideas from presentation of other competing teams; however proper citing is essential.
- 11) During a stage of physics fight, it is strictly prohibited to use any kind of electronic communication, in particular connect to internet.

- Grading of every juror must be objective and fair. It takes into account the overall performance of the team during the whole stage, including questions/answers and discussion.
- Before showing the grades, all jurors have to write their grades clearly into the marking sheets. Chairman will check if this was done properly; after this check the change of grades is not allowed.
- If there is a single highest or lowest grade of a jury member, the jury member is asked to shortly explain his/her grading; this is done for all stages only after all grades for all stages are shown.

Team participation during the fight:

- Teamwork within the team is wished also during the physics fights, so team members have to be encouraged to help their team-mates within the scope of regulations.
- Only one team member takes the stage as Reporter, Opponent or Reviewer. Other team members are allowed to:
 - Post concrete questions and give concrete answers (also to questions from Jury).
 - Provide language support during the whole fight.
 - Help with the presentation of experiment and help technically (e.g. with computer presentation).
 - Pass written notes to Reporter, Opponent or Reviewer.
 - Give statements on specific issues during to discussion (only one team member at time).
